**Subject:** Re: #26460 - Data Platform video

Craig,

Looking over the shoot script, it looks like 16 - 18 graphics call outs in the script. Some are pretty easy once set up to reuse. 8 - 11 days I am thinking just right off the top, but as we get into it depending on complexity it can get faster turn arounds absolutely, I am not 100% on how this is all going to look or the level of absolute complexity involved here. but once I get through some general assets construction and element prep, construction of animation sequences tend to speed up as well.

Hope this helps

Alan

Hi Bill – Just spoke to Archie – And yes it's 1am in Houston .

Beginning animation - can you have the VO stop after the line "Still make it through" She will pick up live with her commentary. I think the rest works visual wise. Let's also remove the logo at the end. That way it just transitions from the maze to her PPT slides and I don't have to worry about her pacing.

Thanks,

**Lindsey Benton**

HI Bill

Couple of comments on the animation

1) Beginning animation – It looks like we come out the same side we go in. Are we able to have it go out the other side? IF we don't have time to make that happen let me know.

2) Ending animation – I'd like to see if we could do an alternative take here.

a. Show beginning as is – maze zoomed out, reverse zoom into HPE logo that transitions to the :36 TM (person on ipad) to the end of the [this commercial here on youtube](#) showing proofing monster & clean up with NO AUDIO.

i. You can download the video file from [PSNow](#) by searching "monster."

Hi Bill – Just spoke to Archie – And yes it's 1am in Houston .

Beginning animation - can you have the VO stop after the line "Still make it through" She will pick up live with her commentary. I think the rest works visual wise. Let's also remove the logo at the end. That way it just transitions from the maze to her PPT slides and I don't have to worry about her pacing.

Thanks,

**Lindsey Benton**

Hi Bill

Couple of comments on the animation

1) Beginning animation – It looks like we come out the same side we go in. Are we able to have it go out the other side? IF we don't have time to make that happen let me know.

2) Ending animation – I'd like to see if we could do an alternative take here.

a. Show beginning as is – maze zoomed out, reverse zoom into HPE logo that transitions to the :36 TM (person on ipad) to the end of the [this commercial here on youtube](#) showing proofing monster & clean up with NO AUDIO.

i. You can download the video file from [PSNow](#) by searching "monster."

Thanks,

Good Morning Bill,

SO I have the alternate ending in. I hope this is what they are looking for.

[http://nodepost.com/hpe/Maze/hpe\\_maze\\_ani\\_v11.mp4](http://nodepost.com/hpe/Maze/hpe_maze_ani_v11.mp4)

as far as reanimating the exit point how much time do we have?

Alan

On Mon, Feb 11, 2019 at 10:11 PM Glenn, Bill <[bill.glenn@hpe.com](mailto:bill.glenn@hpe.com)> wrote:

Hey Alan,

Please see the comments below. Is there anything you can do regarding number 1 below? It doesn't bother me that we exit the way we came in, but she'd like to know if it's possible to alter the exit point,

Number two. At 36 seconds in, the monster starts poofing away in four different locations. I'm downloading the spot and will get it to you via Google Drive or something else.

Bill

HI Bill

Couple of comments on the animation

1) Beginning animation – It looks like we come out the same side we go in. Are we able to have it go out the other side? IF we don't have time to make that happen let me know.

2) Ending animation – I'd like to see if we could do an alternative take here.

Hi Bill – Just spoke to Archie – And yes it's 1am in Houston .

Beginning animation - can you have the VO stop after the line "Still make it through" She will pick up live with her commentary. I think the rest works visual wise. Let's also remove the logo at the end. That way it just transitions from the maze to her PPT slides and I don't have to worry about her pacing.

Thanks,

Bill,

Yes, any one can download the link by right clicking it and choosing save file as or save link as from the <http://nodepost.com/hpe/Maze/> directory.

but for convince I have zipped up both of the news versions and posted to the server for download.

Download Link

[http://nodepost.com/hpe/Maze/hpe\\_maze\\_final.zip](http://nodepost.com/hpe/Maze/hpe_maze_final.zip)

I do understand I am rendering out the end right now to match to the main show. mainly I sent this so you can see the type of loop what I did to speed up the render for this quick fix

On Wed, Feb 13, 2019 at 9:28 PM Glenn, Bill <[bill.glenn@hpe.com](mailto:bill.glenn@hpe.com)> wrote:

Looks good. Did you understand that they need the extra content at the end of the maze animation because Archie is speaking live over it? This is great, but I'm not sure they'll know how to use it. I'm hoping you don't have to re-render the whole animation, but can you match frame and edit this on to the end to add the extra time?

Dave,

no sir, let me rephrase sorry for the confusion.

option A: I say we use the silhouette of a boxer like white back ground with like a hpe green outline, and place the Cisco and the Dell logo on it either like a chain or just on it. and then have dave punch that out.

option B: find a beat up face picture, super impose the Cisco logo and Dell logo on top put into a box and again Dave punches it out.

option C: look to see if there might be a funny boxing character animation on pond 5 and similar to B or A add the logo of Cisco and Dell and have dave punch that out.

just some ideas to help this part along and make it funnier and clean.

what do you think?

Alan

no sir, let me rephrase sorry for the confusion.

option A: I say we use the silhouette of a boxer like white back ground with like a hpe green outline, and place the Cisco and the Dell logo on it either like a chain or just on it. and then have dave punch that out.

option B: find a beat up face picture, super impose the Cisco logo and Dell logo on top put into a box and again Dave punches it out.

option C: look to see if there might be a funny boxing character animation on pond 5 and similar to B or A add the logo of Cisco and Dell and have dave punch that out.

just some ideas to help this part along and make it funnier and clean.

what do you think?

Alan

Dave,

no sir, let me rephrase sorry for the confusion.

option A: I say we use the silhouette of a boxer like white back ground with like a hpe green outline, and place the Cisco and the Dell logo on it either like a chain or just on it. and then have dave punch that out.

option B: find a beat up face picture, super impose the Cisco logo and Dell logo on top put into a box and again Dave punches it out.

option C: look to see if there might be a funny boxing character animation on pond 5 and similar to B or A add the logo of Cisco and Dell and have dave punch that out.

just some ideas to help this part along and make it funnier and clean.

what do you think?

Alan

---

Dave,

I am not necessarily done, I am just trying to do as you asked.

I was gonna say wouldn't it be cool though if it was like boxer silhouette or like clip art, like super punchout? or maybe a stupid character animation from pond 5 with like the logo hung like a chain or something from the neck, wouldn't that be funnier and better than this?

Let me know

Alan

I'm sorry... It needs to say... "from Madrid, Spain." (Underlined only for YOUR purposes, not in the actual graphic.)

That's the official title of the event... "AEM Live! from Madrid, Spain"

Thanks!

Bill,

Excellent, mission accomplished and I would have to agree, you are a pleasure to work with. Yes I would love to be able to get in something more complex, looks better and over all dynamics are mind blowing, but a job well done is good stuff. I am learning Houdini and have the Independent License, maybe by the next one I can bring more punch quicker, looking forward to it absolutely. As always I truly appreciate the work you allow me to do, Thank you.

Alan

Not at all. I was just about to email you. :)

Everything was fantastic. People laughed during the beginning maze video and clapped after the video Rory did!!

Thank you so much for making this happen. Archie was super pleased.

I also sung your praises to Karl and Kara. You've been fantastic to work with. I know this wasn't the easiest process. Thanks for making it fun and producing great work in a short amount of time.

Looking forward to working together next time.

Thanks,

Bill,

I absolutely don't like that I am having to do this, but as of today I being threatened by Craig that he will not work with me on projects as he is personally upset with my hire with Experis and pay scale.

I have told him multiple times now that I am not able to discuss my pay arrangements with him, that I turn in my time on a project to you and you log my hours and have me paid on the agreements of my hire. He is claiming he has never worked with anyone so difficult, but also says I have performed his work flawlessly and in half the estimated time frame but still is upset about my pay agreement with Experis.. he literally has no issue with the work I have done or compliance to his requests.

I have tried diligently to work this out individually with him directly, but he is very frustrated with the circumstances and presses me more and more for how much money I am logging for this.

at this point I feel I need support form the team here to help.

I am here to get it done as fast as possible in a moments notice, I don't understand why I am being threatened to loose work or not be selected to work on his assignments because he does not like the pay agreement I have with the company.

I am absolutely apologetic to have to involve you with this but it seem the issue is actually out of my hands to deal with.

Thank you for your time,

Alan

Hi Alan,

RE: the animation showing darts going through the cell tower and being “blocked” before reaching car-company Y, and, then, car company X.

Just spoke with Craig. There’s a change we’d like to make. Craig finds the current version confusing, and I think I know why. I change will clear this up.

Bear with me...

When my VO speaks to company-car Y “blocking” data from company-car X, currently you have a green cross-hatched “box” that appears around the car that does the “blocking.”

The same behavior occurs on the other side... a similar box appears around “company-car X” to block data.

ACTION ITEM: Let’s get rid of those “boxes” to represent the “blocking,” and replace those boxes with something cleaner that does the “blocking.”

ACTION ITEM: Let’s, instead, use a symbol which represents “no.” Craig and I were thinking of the “international no” symbol—the diagonal line cutting through a red circle. But! That symbol may not be brand compliant. (And the color “red” certainly is not.)

ACTION ITEM: Scroll through the brand-approved iconography to see if HPE has a “no-like” symbol or ANYTHING we can use instead of those “boxes” to demonstrate “blocking” of data.

IN OTHER WORDS: Replace those green boxes that are doing the “blocking” with some kind of elegant symbol.

Yes Sir,

I have uploaded all the animations of current already and I stand by waiting to make the change readily.

here is the link to all the current animation sequences in full rez

<http://nodepost.com/hpe/dmp/grfx.zip>

waiting for additional direction

Thank you for your time,

Alan

Hi Alan,

RE: the animation showing darts going through the cell tower and being "blocked" before reaching car-company Y, and, then, car company X.

Just spoke with Craig. There's a change we'd like to make. Craig finds the current version confusing, and I think I know why. I change will clear this up.

Bear with me...

When my VO speaks to company-car Y "blocking" data from company-car X, currently you have a green cross-hatched "box" that appears around the car that does the "blocking."

The same behavior occurs on the other side... a similar box appears around "company-car X" to block data.

ACTION ITEM: Let's get rid of those "boxes" to represent the "blocking,"

and replace  
those boxes with something cleaner that does the “blocking.”

ACTION ITEM: Let’s, instead, use a symbol which represents “no.” Craig and I were thinking of the “international no” symbol—the diagonal line cutting through a red circle. But! That symbol may not be brand compliant. (And the color “red” certainly is not.)

ACTION ITEM: Scroll through the brand-approved iconography to see if HPE has a “no-like” symbol or ANYTHING we can use instead of those “boxes” to demonstrate “blocking” of data.

IN OTHER WORDS: Replace those green boxes that are doing the “blocking” with some kind of elegant symbol.

I haven't had time to review Brand icons so I do not know if the red circle/slash is compliant.

Secondarily, and maybe I'm dense on this, is I do not under the portion of the animation we are discussing. So, let's definitely get this in the next version of the video so the clients can review before our call tomorrow and comment accordingly.

I don't even understand Dave, there no argument here. I made the change according to your initial direction, now you want something else which is fine. I seriously do not even understand the aggression here. my question of platform is technical and not intended as insulting. Level with me whats going on here and how can I help?

Dude my editing platform does not matter.

I've done this before. I've done this with Push. You are not listening to me.

The platform I am editing on DOES NOT MATTER! Time and space are the same.

I WILL NO LONGER ARGUE WITH YOU.

I need your animation TIMED to my voice over where we have "black and text."

Period.

Then. You have to back time your animation so it STARTS at that point.

CURRENTLY. When I dissolve to your animation, the cars have already ARRIVED at the cell tower. If I SHIFT it, it is no longer synced to my voice. Get it.

Your "oh geez" comment when I mentioned FCPX was not called for.

Maybe you're a genius, and I'm an idiot. Fine.

\But, I'm also you boss. Period.

Hi Alan,

RE: the animation showing darts going through the cell tower and being "blocked" before reaching car-company Y, and, then, car company X.

Just spoke with Craig. There's a change we'd like to make. Craig finds the current version confusing, and I think I know why. I change will clear this up.

Bear with me...

When my VO speaks to company-car Y "blocking" data from company-car X, currently you have a green cross-hatched "box" that appears around the car that does the "blocking."

The same behavior occurs on the other side... a similar box appears around "company-car X" to block data.

ACTION ITEM: Let's get rid of those "boxes" to represent the "blocking," and replace those boxes with something cleaner that does the "blocking."

ACTION ITEM: Let's, instead, use a symbol which represents "no." Craig and I were thinking of the "international no" symbol—the diagonal line cutting through a red circle. But! That symbol may not be brand compliant. (And the color "red" certainly is not.)

ACTION ITEM: Scroll through the brand-approved iconography to see if HPE has a "no-like" symbol or ANYTHING we can use instead of those "boxes" to demonstrate "blocking" of data.

IN OTHER WORDS: Replace those green boxes that are doing the "blocking" with some kind of elegant symbol.

Dave,

I wanted to mention in reference to this comment - **KILL THE ANIMATION FOR** “Car company ‘X’ competes with ‘Y.’ That is now Dave on camera (VO: “But, car company ‘X’ competes with ‘Y.’”) Producer’s call-Craig Taylor) Sorry you wasted time doing this animation where each car “balloons.” Again, script change. (But, you DO have the correct version to work off of.)

I did notice that you had yourself back on cam for this, but I made the animation with the intention for you to cut that out and pick it up after without actually having to shift anything around and the second part of the animation lines up accordingly with the edit, thus also allowing pad as well.

I don't know if that was clear or not so I wanted to make sure you understood that.

Thank you for your time,

Alan

This timecode is as per my timeline—as the entire story as you see it laid out on Vimeo.

@ 01:09:07 I will begin the dissolve here—the moment “Dave” stops speaking  
@ 01:09:27 At this point, I will NOW be ON the animation FULL... if I was not dissolving, I would be CUTTING to your animation at this point... but the cars have yet to roll in!  
@ 01:11:00 Car “Y” drives into frame... (followed by “X,” at some point.)  
@ 01:13:00 Car “X” and Car “Y” have each reached their destination, equidistant on each side of the cell tower.  
@ 01:15:10 The data begins to transmit from “X” up to the cell tower... on it's way toward “Y”  
@ 01:20:00 The data stream HAS REACHED car “Y” by this point  
@ 01:20:25 A data stream QUICKLY returns back through the cell tower to “X”  
@ 01:21:29 = END OF MEDIA... I will CUT back to “Dave” driving... (VO: " but

give me some pad to be good. In other words, even though the action is completed, let the "data twinkle on/off in the 'circuit'"

\*This is different from what I told you on the phone. But let's try this "reverse." It will be almost as soon as the first stream reaches "Y," and it will QUICKLY go back. Very fast! ...from "Y" back to "X."

**WE STAY ON DAVE FOR THE NEXT TWO SHOTS:** (PRESENTLY, You have Dave covered. He is to be seen.)

**KILL THE ANIMATION FOR** "Car company 'X' competes with 'Y.' That is now Dave on camera (VO: "But, car company 'X' competes with 'Y.'") Producer's call-Craig Taylor) Sorry you wasted time doing this animation where each car "balloons." Again, script change. (But, you DO have the correct version to work off of.)

@ 01:27:18 PICK UP THE NEXT BATCH OF ANIMATION HERE. (VO: "Hewlett Packard Enterprise partnered with..." I will CUT to it. So, in theory I do not need pad, but it would be wise to gimme a couple of frames...

**NOTE:** The "C" in "Continental" is "sliced" on the left side when you push it back!

@01:42:01 = This batch of animation ENDS. We will CUT to CU of Dave on the side of the Freeway... can you spare me a few frames?

DS

Never mind! Got 'em! Push converted those files for me using some Avid software. Thanks! I'm gonna go edit now!

Dave,

I wanted to mention in reference to this comment - **KILL THE ANIMATION FOR** "Car company 'X' competes with 'Y.'" That is now Dave on camera (VO: "But, car company 'X' competes with 'Y.'" Producer's call-Craig Taylor) Sorry you wasted time doing this animation where each car "balloons." Again, script change. (But, you DO have the correct version to work off of.)

I did notice that you had yourself back on cam for this, but I made the animation with the intention for you to cut that out and pick it up after without actually having to shift anything around and the second part of the animation lines up accordingly with the edit, thus also allowing pad as well.

I don't know if that was clear or not so I wanted to make sure you understood that.

Thank you for your time,

Alan

All,

First of all, I would like to thank all of you for your support today, it is much appreciated. Second I would like to apologize for pestering you all with this.. all day.

As of this moment, all is well and everyone has what they need, as far as I know, to make progress.

Thank you for your time,

Alan

Bill

The project I am currently working is 26460 Data Monetization Platform. the HPE in 60 021919 was what I was on last week, I was not given a project number for any of the projects I have worked on since jan 22, I will be happy to include the project numbers for future submissions.

Hope this helps

Alan

Bill

The project I am currently working is 26460 Data Monetization Platform. the HPE in 60 021919 was what I was on last week, I was not given a project number for any of the projects I have worked on since jan 22, I will be happy to include the project numbers for future submissions.

Hope this helps

Alan

**To:** Alan S Johnson JR <[nodepostcom@gmail.com](mailto:nodepostcom@gmail.com)>, ALAN S JOHNSON <[ajohnson@nodepost.com](mailto:ajohnson@nodepost.com)>

**CHANGE ORDER:**

This animation (low Rez file attached) should begin with the cars rolling in but WITHOUT the "X's" and "Y's." Also: The "cell tower" should NOT be established at the start of this animation. It's just the cars rolling in on the highway.

Then, @ 00:06 in (on the file attached) fade IN the "X's" and "Y's" above the cars... and then, after those fade in... THEN fade on the cell tower...

The rest of the animation is okay!

Now... I've LEFT my dissolves in so you can see how much pad I need. And leave me some pad at the end, even though it's a "cut." Cuz, I may need room to do some stuff.

Thanks!

**CHANGE ORDER:**

This animation (low Rez file attached) should begin with the cars rolling in but **WITHOUT** the "X's" and "Y's." Also: The "cell tower" should **NOT** be established at the start of this animation. It's just the cars rolling in on the highway.

Then, @ 00:06 in (on the file attached) fade IN the "X's" and "Y's" above the cars... and then, after those fade in... **THEN** fade on the cell tower...

The rest of the animation is okay!

Now... I've LEFT my dissolves in so you can see how much pad I need. And leave me some pad at the end, even though it's a "cut." Cuz, I may need room to do some stuff.

Thanks!

- Dave Stoelk

Hey there:

One of the notes from the client is this:

- **[1:21] C of Continental logo is cropped**

I put this in one of my notes, right? Yesterday I pointed this out. Clients, as you know are VERY persnickety when it comes to their logo.

Here's my question: (And I don't mean for it to be pointed.) Do you "miss" my notes, or decide not to entertain them? For example, I noticed in the last HPE in 60, I would give a list of say, 8 notes, and, maybe 5 would come back realized.

So, I'm honestly NOT trying to provoke a fight; I just want to see where the communication is breaking down, and how we can improve it.

Dave,

1.) While I'm writing my narrative, can you go over EVERY thing you've created, and make darn sure EVERY icon, is from the pre-approved "assets" or "illustrations" library? Umbrella? Hazard symbols, etc.

the car crash icon we made with the use of other icons up because we don't have a brand icon to illustrate that the umbrella icon I added rain animation to and a black box to unify the design  
the parking icon was we made with the use of other icons to illustrate parking as we do not have an icon for that either.

2.) While I'm writing my narrative, can you please look at the Continental links that they've sent us thus far, and see where we are deficient with regard to the "black holes" that still exist for "Continental" on the timeline. What do we need? How does that compare

with what they've already sent uts.

I have sent you everything you need to do the continental navigation edits, we decided on our call yesterday the best way to do this was to have you cut in the in-car-hmi.mov since you are the editor and finisher of this project.

here is the link again to those assest if you need

BG

Alan,

The best way to handle this is to stop trying to coach Dave. Although your intentions are good, telling him to 'give it a rest' or to 'chill' just stokes the aggravation. I know you mean well and I wouldn't take issue with it (I wouldn't have gotten into a mess like this in the first place), but the best way to disarm this toxic communication cycle is to respond in a way that makes him secure that you heard the salient points in his direction and ignore any emotion. For instance: Yes, I will double check the iconography and make sure it's all brand compliant and from approved sources. Yes, I will check the links from Continental to asses the black holes issue. Keep it business focused.

Stop trying to address his emotional state because the one thing you are certain of here is that, for whatever reason, YOU are the reason he's pissed and any attempt you make to diffuse the situation with words is only making it worse. It comes off as disrespectful. If you'd like to have a phone conversation, I'm here for you. But, it feels like you should focus on the task at hand and make sure you're not missing any items on the list.

Bill

I don't get it either. We're not gelling. I don't get it.

I don't. I've worked in THE MOST high pressure newsrooms covering world events... with HUGE deadlines. And, I have not gotten this heated with an editor. So... There it is.

**But, let's get this done.**

I guess I had my ire raised cuz, I was being asked to download .ai files and send them to you, when you have access to the same site. And, I literally sent you a screen shot off my phone, with no intention of having you use that as a graphic. I was only giving you a reference. I totally know what file types are needed for Adobe Illustrator and After Effects But... whatever. I'm going to type a bunch of "... " and it's done. Let's not respond about this anymore. Please do not respond to this. It's over. Okay?

.....  
Okay.

I just got off the phone.

1. I've a fair amount of change orders. I **will write you a narrative with TC of what we need.**
2. **Brand sez we CANNOT make ANY icons on our own! ZERO.** (We are allowed such allowance for "in-house." But not for external." We are not allowed to create our own iconography or alter existing iconography.)
- 3.) We need to start working on the "Continental" interface. There are three "black holes" that sill exist in the piece where we have to show what the various "hazards" will look like on their interface, and as called-out in the script.

**ACTION ITEMS: (Things to do right now)**

- 1.) While I'm writing my narrative, can you go over EVERY thing you've created, and make darn sure EVERY icon, is from the pre-approved "assets" or "illustrations" library? Umbrella? Hazard symbols, etc.
- 2.) While I'm writing my narrative, can you please look at the Continental links that they've sent us thus far, and see where we are deficient with regard to the "black holes" that still exist for "Continental" on the timeline. What do we need? How does that compare

consistent with regard to the "black holes" that still exist for "confidential" on the timeline. What do we need? How does that compare with what they've already send uts.

In approx. 1 hour, I will have the change orders for you.

Bill I apologies to you for this,

I know that, because I just told him, he is not used to someone standing up for him self, he wants push, he has been gunning to cut me out from the get. I told him to back off because I am not one to take his shit. and I am not going to quit, so he is gonna go the next step. but the truth is Dave has not tried to work with me actually, he has consistently created issues to try and make me look bad, but I won't let him and I am brutally honest. so.. with that being said I think the guy needs to learn some solid leader ship skills and communication skills.

so I get it. Dave fires Alan.

But its on record how much of his bullying I took before I told him to chill.

Please get rid of the "rain" Brand does not like

Please get rid of the "rain." Brand does not like.

Also get rid of the "platform." Brand does not allow ANY 3-d-looking animation on motion graphics. And your "platform" to them is "3D." We can't argue that.

In the meantime... standby for a narrative.

And... You, Craig, and I are going to have a conference call to work out the "Continental" thing.

Condolences to you Dave and I am sorry for your loss. I would really appreciate a conversation at some point and your convenience. I would like to discuss a communication style that works and get things done with no hassle for you. I feel this one got away from us and I don't like sitting here feeling like we are not going to work together anymore or that you do not want to work with me anymore. Is there a way where we can come to some terms that work for you and me? this job is very very important to me.

I wish you safe travels

Alan

I am sorry in advance. I can't call you.

I'm getting ready to bury a family member. Lots of drama personally. I just can't take anymore of the drama that you and I had. I don't have the emotional bandwidth at this point.

I have to travel with family across the country, one of whom has special needs.

In any event (and there was lots of "events") the project is well on its way to being put to bed.

Let's move on. I wish you well. And I'm not being glib or trite when I say that. I wish you well.

I will be ready for what ever changes come down from Brand and take care of them as immediatly as possible

On Thu, Feb 21, 2019 at 1:19 PM Dave Stoelk <[stoelk@gmail.com](mailto:stoelk@gmail.com)> wrote:

This final graphic looks great. I will put it on the timeline and send it up the flagpole.

Also, we have what amounts to "probationary" Brand approval. (It's a long story.)

Short story: Tomorrow and Saturday there MAY be tweaks. I'll be flying across the country to a funeral. I will bring my laptop and a RAID and my phone.

We're all good as of right now. ((Knock-wood)) Thank you for this final push.

DS

This final graphic looks great. I will put it on the timeline and send it up the flagpole.

Also, we have what amounts to "probationary" Brand approval. (It's a long story.)

Short story: Tomorrow and Saturday there MAY be tweaks. I'll be flying across the country to a funeral. I will bring my laptop and a RAID and my phone.

We're all good as of right now. ((Knock-wood)) Thank you for this final push.

AAC is the official audio codec of HPE I have been informed. Both here and at AEM. Thanks David and Alvaro for the quick responses.

Subject: Re: Specs for live event videos

Good point.....Thanks Mike.

We need to remember that the specs we like are not as important as what the engineers working the gear at the event want. They need a format that works with their machines, and don't want a technical hold up when there's a room full of people and executives wondering why the video hasn't started (or webcast)

When I first asked about specs for this AEM, I thought the engineers who will be on site were consulted.

If that is the case....Awesome.... I will export according to the specs Karl sent.

Any of the engineering people copied on this email:

If you know what is needed for the gear they are using in Spain for this AEM please chime in.

Unless I hear otherwise, I will deliver my videos in the specs that Alvero & Karl first noted:

**Format: H.264 (.mp4)**

**Resolution: 1920x1080**

**Frame rate: 29.97 fps**

**Total bitrate: 5Mbps**

Audio: Stereo, 44.1 kHz, 128 mbps

Mike L., thanks again for pointing this out

Rory Keenan

**Subject:** RE: Specs for live event videos

Hi All,

I continue to stress that we must be working across boundaries and that the engineering team must be included in these types of conversations and they aren't even include on this e-mail. So I am adding them on this reply to make sure that we are all on the same page and not working within arbitrary silos. The engineering team buys and maintains the equipment we use and they need to understand what is going on with our productions and what is "needed." They also happen to have tons of experience encoding videos so they should not be left out of any such conversation.

Mike

**Subject:** Specs for live event videos

Hi all

\*\*\*

Spoke to Alvaro about standardizing specs for all videos being used for live events. These are the specs we'll use moving forward as our default....(UNLESS TOLD OTHERWISE due to special circumstances):

Format: H.264 (.mp4)  
Resolution: 1920x1080  
Frame rate: 29.97 fps  
Total bitrate: 5Mbps  
Audio: Stereo, 44.1 kHz, 128 mbps

If you disagree with these specs, let's discuss.

Please spread the word...

Thanks!!

We need to remember that the specs we like are not as important as what the engineers working the gear at the event want. They need a format that works with their machines, and don't want a technical hold up when there's a room full of people and executives wondering why the video hasn't started (or webcast)

When I first asked about specs for this AEM, I thought the engineers who will be on site were consulted.

If that is the case....Awesome.... I will export according to the specs Karl sent.

Any of the engineering people copied on this email:

If you know what is needed for the gear they are using in Spain for this AEM please chime in.

Unless I hear otherwise, I will deliver my videos in the specs that Alvero & Karl first noted:

**Format: H.264 (.mp4)**

**Resolution: 1920x1080**

**Frame rate: 29.97 fps**

**Total bitrate: 5Mbps**

**Audio: Stereo, 44.1 kHz, 128 mbps**

Mike L., thanks again for pointing this out

Hi All,

I continue to stress that we must be working across boundaries and that the engineering team must be included in these types of conversations and they aren't even include on this e-mail. So I am adding them on this reply to make sure that we are all on the same page and not working within arbitrary silos. The engineering team buys and maintains the equipment we use and they need to understand what is going on with our productions and what is "needed." They also happen to have tons of experience encoding videos so they should not be left out of any such conversation.

**Subject:** Specs for live event videos

Hi all,

Spoke to Alvaro about standardizing specs for all videos being used for live events. These are the specs we'll use moving forward as our default....(UNLESS TOLD OTHERWISE due to special circumstances):

Format: H.264 (.mp4)  
Resolution: 1920x1080  
Frame rate: 29.97 fps  
Total bitrate: 5Mbps  
Audio: Stereo, 44.1 kHz, 128 mbps

If you disagree with these specs, let's discuss.

Please spread the word...

Thanks!!

KN

Yup...thanks Mike.

I jumped the gun with the "default" comment (was trying to get thru a million emails in a cab while heading from SFO to my home and wasn't thinking about what's in store for us at the new facility).

The specs I sent were focused on those needed for our AEM here in Europe (sat truck feed).

We'll all definitely need to wait to find out from Massey and the rest of the engineering team what we'll be using moving forward with the new space. So...thanks for all the input, it's a great start to nailing down a default for future events in Santa Clara. Let's hold off on more input until we have time to speak with engineering and find out what they have in mind since they know the new equipment forwards, backwards and every which way in between.

Thanks all! Cheers!

**Subject:** Re: Specs for live event videos

Good point.....Thanks Mike.

We need to remember that the specs we like are not as important as what the engineers working the gear at the event want. They need a format that works with their machines, and don't want a technical hold up when there's a room full of people and executives wondering why the video hasn't started (or webcast)

When I first asked about specs for this AEM, I thought the engineers who will be on site were consulted. If that is the case....Awesome.... I will export according to the specs Karl sent.

Any of the engineering people copied on this email:

If you know what is needed for the gear they are using in Spain for this AEM please chime in.

I Unless I hear otherwise I will deliver my videos in the specs that Alverno & Karl first noted.

Unless I hear otherwise, I will deliver my videos in the specs that I've noted & Karl has noted.

**Format: H.264 (.mp4)**  
**Resolution: 1920x1080**  
**Frame rate: 29.97 fps**  
**Total bitrate: 5Mbps**  
**Audio: Stereo, 44.1 kHz, 128 mbps**

Mike L., thanks again for pointing this out

Rory Keenan

**Subject:** Specs for live event videos

Hi all,

Spoke to Alvaro about standardizing specs for all videos being used for live events. These are the specs we'll use moving forward as our default....(UNLESS TOLD OTHERWISE due to special circumstances):

Format: H.264 (.mp4)  
Resolution: 1920x1080  
Frame rate: 29.97 fps  
Total bitrate: 5Mbps  
Audio: Stereo, 44.1 kHz, 128 mbps

If you disagree with these specs, let's discuss.

Please spread the word...

Thanks!!

10 – 15 is pretty standard, and 48k for audio. I think this is our consensus.

Usually edit in 48k for audio as standard, that's basically a flip since that is how we record audio in the first place.

Hi all,

Spoke to Alvaro about standardizing specs for all videos being used for live events. These are the specs we'll use moving forward as our default....(UNLESS TOLD OTHERWISE due to special circumstances):

Format: H.264 (.mp4)  
Resolution: 1920x1080  
Frame rate: 29.97 fps  
Total bitrate: 5Mbps  
Audio: Stereo, 44.1 kHz, 128 mbps

If you disagree with these specs, let's discuss.

Please spread the word...

Thanks!!

Hi All,

Hope everything is going well and everyone is busy, I have been standing by for min to have a convo with Dave, work kinda fell off the map here with hpe since this last round. I did get a chance to exchange texts with Dave last week and he informed me that he has stated to all of you that I should not be losing any work on the accounts of the last project. I know he was stressed to the max with everything going on in his life and I have not held it against him that we all come unglued sometimes when facing majorly stressful and or emotionally draining situations.

That being said it has been almost a month of no work for me and with 3 recent bookings canceling in a course of 3 weeks I am kinda stressed for some bookings at the moment.

Do any of you have anything going on I can jump on? I would love to get to work right away.

Thank you for your time,

Alan

Hi Craig, thanks, I'll check with Paulina.

As mentioned, Wednesday is no hard deadline, so we can also do the call next week if it's not feasible today.

Background: we are planning to do a little social-media "campaign" around the video and need it on Youtube for that, and, as discussed, we wanted to get Brand approval before we upload on Youtube. But we have not yet determined the timing. Could be that we do it prior to Discover, but not sure.

Kind regards, Patrik

**Importance:** High

Hi Patrik-

We might be able to meet your deadline of next Wednesday but in order to do so we need to have a conference call with the Brand representative to get absolute clarity on what changes need to be made. Complexity of changes will also affect the cost to implement.

Alan, Dave, my colleague Bill and myself are all available on Friday the 29<sup>th</sup> from 9:30 – 10:15 AM. Unfortunately, this is the only time the four of us are available. Hopefully you and Paulina are available as well, if so, please send a Skype invite.

Regards,

Craig

Patrik-

Is it possible to move our call with Brand to Thursday, 8:00 AM pacific time?

If not I can still make tomorrow's call but moving would help me with my schedule.

-Craig

We have budget approval from the client and can now move forward with the Brand requested change to the DMP video. Please note I have created a new project/number for this fix.

Brand feedback PDF attached.

Budget only allows for (1) day for each of you, which should be sufficient.

Dave – Remove logos from beginning – page 2

Dave – Create the title card as requested on page 3

Alan – please adjust the dotted line stroke as requested on page 4.

Alan – Readjust the size of the people on page 7 by 50 %

Dave – Remove logos as requested – page 9 (you can leave the negative space, or punch in, whichever you feel looks best.)

I would like to have complete by the end of the week.

-Craig

But I kinda knew it might look odd later down the line and from the start, I was hired for the day so, yes I did make the changes to all the graphics, How ever this is not the agreement as I understand with what Craig has requested. but in any case if anyone changes their mind, I went ahead and did what I could with out modifying the icons or original art of HPE. The line thickness on the icons and asset art is a sticky situations, it means modifying that art which I believe is not with in the brand rules.

Hi Alan,

I got your first string of graphics... gfx 3.

Am I also waiting on more? gfx 4? (Or more?)

Don't mix text with illustrations.

Don't use cloud shape with dolar symbol. You can repla this shape with a simple rectangle.

Use dedicated illustration for data transfer. Each of thes elements should not overlap.

---

Will I still have access to hires ProRes files?

(I see they're now delivered as .mp4 for Craig.)

;)

Hi Paula,

Thank you for reaching out. I am available currently next week starting Monday, schedule a time that works for you. Please feel free to book a slot at <http://sffreelance.com>

time that works for you! Please feel free to have a look at my work at <http://sffreelance.com>

I have done a little freelance work previously with Leslie Karaffa and Luke Paddington a couple years ago. I would be happy to speak about further and more frequent bookings with Cisco.

Thank you for your time

Alan

Alan,

Bill Glenn recommended we speak with you about editing at Cisco TV in a freelance capacity. Please let me know of your availability next week for a half hour call with myself and Patrick Haynes, our production manager. Please also confirm if we can call you at 628.777.6097. He forwarded your resume to us as well.

Thank you.

-Paula

Hi Alan,

Thanks for the quick response! Since reaching out to you the project we needed someone for has been put on hold. I'm unclear exactly what's happening with it. I'll put our call on hold until I get more clarity. Sorry for the change in direction, I hope to get back to you soon with the full steam ahead.

Hi Paula,

Thank you for reaching out. I am available currently next week starting Monday, schedule a time that works for you! Please feel free to have a look at my work at <http://sffreelance.com>

I have done a little freelance work previously with Leslie Karaffa and Luke Paddington a couple years ago. I would be happy to speak about further and more frequent bookings with Cisco.

Thank you for your time

Alan

Hi Bill,

My hours for this week are,

Tuesday 04.16.19 hours 8:30am - 9:30 pm

Hope to get back going soon! Thank you again for referring me to Cisco, nothing yet has been booked, but I am hoping they do soon! I am standing by for anything that opens up currently and looking regularly for projects, fingers crossed.

Thank you for your time,

Alan

Bill, Karl, Michael,

Hope all well, sorry to be a pest, I am looking for projects and bookings and just want to stay on your minds as things develop. I realize HPE in :60 has a set editor and I am here for back up when needed. How ever I would like to start a conversation with you as I am wondering if there are any other options either of you may be familiar with that I would be a good fit to work on? again apologies to bug, two months no work is killing me right now, I am looking at any option out there available right now to get work flowing in. a little help here would be greatly appreciated

Thank you so much,

Alan

Hi all,

As its really slow fo me rn, I am staying active making things. I noticed a lot of graphics coming out of HPE resemble a look like this. so I developed a flexible rig to create backgrounds lower thirds and what not that match a lot of the art I see from HPE, I just wanted to share and hope that you all have a project for me to work on soon.

#### EMPLOYEE TIME CARD INSTRUCTIONS FOR CLARITY TIMECARD W2 Consultants

Clarity Consultants, a Division of Pacific NetSoft, pays employees biweekly, every other Thursday. **All approved time must be submitted to Clarity Consultants on Friday, no later than 5 p.m., Pacific Time.** Time received, with or without approval, after 5 p.m., Pacific Time, on Monday, will delay your paycheck by two weeks.

#### **Clarity Consultants Electronic Time Card and Expense System (Clarity Time & Expense)**

Upon start of your project, your login instructions for the Time & Expense system will be sent to you in an email from [webtimexp@clarityconsultants.com](mailto:webtimexp@clarityconsultants.com). Using this system, you must submit time every Friday, by end of day, for approval by your designated manager. When you submit time, an email is automatically sent to your manager requesting approval. You will receive an email when your time card has been approved.

Add [clarityconsultants.com](mailto:clarityconsultants.com) to your "Safe Senders" list to ensure these messages do not get routed to your spam folder.

#### ACCESS TO PAYSTUBS AND CHECK DELIVERY

You can view and print your paystubs and W2 statement online through Paychex's website. You will receive your login instructions via email prior to your first paycheck from Clarity Consultants. Neither paystubs nor W2 will be mailed.

Select one paycheck delivery option:

- ☒ Direct Deposit. (Make sure to complete the Direct Deposit Authorization form)  
It may take up to two pay periods for direct deposit to begin. The Payroll Department will mail paychecks until the direct deposit begins. If local to Campbell, CA you may arrange pick-up with Payroll until direct deposit begins.
- ☐ Hold check for pickup. Check pickup is only available at our Campbell, CA office. Please call Clarity Payroll to arrange pickup between 1 p.m. and 4 p.m. on payday.
- ☐ Mail checks. Checks will be mailed on payday. Mail checks to:

#### QUESTIONS

Once on project you may contact Clarity Payroll at (408) 369-6558 ext. 3 with any questions. Alternatively you may contact your Consultant Relations Manager.

### DIRECT DEPOSIT AUTHORIZATION FORM

PLEASE COMPLETE THE ITEMS BELOW AND RETURN TO THE PAYROLL DEPARTMENT. Return by Mail, email [accounting@clarityconsultants.com](mailto:accounting@clarityconsultants.com) or FAX to (408) 369-5995. PLEASE CONTACT PAYROLL IF YOU HAVE ANY QUESTIONS AT (408) 369-5998 ext. 3.

I authorize Clarity Consultants, a division of Pacific NetSoft, Inc., and the bank listed below to automatically deposit my net pay or set amount into my checking/savings account. If funds to which I am not entitled to are deposited into my account, I authorize Pacific NetSoft, Inc. to direct the bank to return the said funds. This does not mean that Pacific NetSoft, Inc. has full control over the account, only the funds Pacific NetSoft, Inc. has deposited. This authority will remain in effect until I have cancelled it in writing, or if and when my employment with Clarity Consultants terminates.

NOTE: Remember your direct deposit will take one to two pay periods before your check will be automatically deposited. Banks need this time to verify that your account number and routing/transit numbers are correct

### EEO-1 Employee Self-Identify Designation Form

Clarity Consultants is subject to certain governmental recordkeeping and reporting requirements for the administration of civil rights laws and regulations. In order to comply with these laws, we invite employees to voluntarily self-identify their race or ethnicity. Submission of this information is voluntary and refusal to provide it will not subject you to any adverse treatment. The information obtained will be kept confidential and may only be used in accordance with the provisions of applicable laws, executive orders, and regulations, including those that require the information to be summarized and reported to the federal government for civil rights enforcement. When reported, data will not identify any specific individual.

Johnson, Alan

## Participant Consent to Receive Electronic Communication

Under the Employee Retirement Income Security Act of 1974 (ERISA) and related regulations, employee consent must be given in order to receive electronic copies of employee benefits materials in certain situations.

The purpose of this notice is to inform you that Clarity Consultants is offering you the opportunity to receive electronically all notices about your employee benefits. Such notices will include (but not be limited to) newsletters, enrollment announcements, Summary Plan Descriptions (SPDs), Summaries of Material Modifications (SMMs), Summary Annual Reports (SARs), COBRA notices, Summaries of Benefits and Coverage, Health Insurance Marketplace Notices and HIPAA certificates of creditable coverage, 401k information, investment options and participant notices.

All notices are accessible at <http://consultants.clarityconsultants.com>.

Each benefit plan in which you enroll has a Summary Plan Description (SPD) that describes the key provisions of the plan. Plan amendments describe any material changes made to the benefit plan since its SPD was originally drafted. A plan's SPD and plan amendments are very important documents.

In order for us to provide you with this opportunity, you must consent to receive all Employee Benefit notices electronically by signing the form below. Prior to consenting, you should understand that:

- When a new benefit notice, announcement, newsletter, SPD or other document is posted to the Internet, you will receive a notification at the email address you provide to inform you of the availability of the document.
- You have the right to withdraw your consent to electronic distribution at any time at no charge to you. To withdraw consent, you must notify Human Resources in writing or by email.
- If you consent to electronic distribution, you may still request a paper version of any document free of charge.
- All benefit notices, including SPDs and plan amendments, will be available on the Internet as PDF files. If you do not have access to the Internet, or if you do not have the programs necessary to view this type of file, you should not consent.
- **Right to paper version.** Even if you consent to electronic communication from the Plan, you always have the right to request and obtain a paper version of any document the Plan furnishes electronically to you. There is no charge for the paper version of the document.
- **Hardware/software requirements.** To access and retain documents communicated electronically, your computer must satisfy the following minimum requirements:
  - Microsoft (i.e. version 7 or higher)
  - Firefox version 3 or higher
  - Google Chrome

To withdraw your consent or update your email address, please contact [chawkins@clarityconsultants.com](mailto:chawkins@clarityconsultants.com).

I consent to the electronic disclosure of all Employee Benefit notices, including Summary Plan Descriptions and plan amendments.

I acknowledge that I have read the contents of this notice and understand that I am entitled to withdraw my consent at any time at no cost to myself. I understand that I have the right to receive paper copies of all Employee Benefit notices, including Summary Plan Descriptions and plan amendments, upon request at no additional charge. I also confirm that I have the ability and the necessary equipment and software to access the Employee Benefits websites, view the documents and print copies.

## New Health Insurance Marketplace Coverage Options and Your Health Coverage

When key parts of the health care law take effect in 2014, there will be a new way to buy health insurance: the **Health Insurance Marketplace**. To assist you as you evaluate options for you and your family, this notice provides some basic information about the new Marketplace.

### What is the Health Insurance Marketplace?

Beginning Jan. 1, 2014, individuals will have access to insurance coverage through the Affordable Care Act's (ACA) health insurance exchanges (Exchanges), which are also known as Health Insurance Marketplaces. Open enrollment under the Exchanges will begin on Oct. 1, 2013.

The Marketplace is designed to help you find health insurance that meets your needs and fits your budget. The Marketplace offers "one-stop shopping" to find and compare private health insurance options. You may also be eligible for a new kind of tax credit that lowers your monthly premium right away. Open enrollment for health insurance coverage through the Marketplace begins in October 2013 for coverage starting as early as Jan. 1, 2014.

### Can I Save Money on my Health Insurance Premiums in the Marketplace?

You may qualify to save money and lower your monthly premium, but only if your employer does not offer coverage, or offers coverage that doesn't meet certain standards. The savings on your premium that you're eligible for depends on your household income.

### Does Employer Health Coverage Affect Eligibility for Premium Savings through the Marketplace?

Yes. If you have an offer of health coverage from your employer that meets certain standards, you will not be eligible for a tax credit through the Marketplace and may wish to enroll in your employer's health plan. However, you may be eligible for a tax credit that lowers your monthly premium or a reduction in certain cost-sharing if your employer does not offer coverage to you at all or does not offer coverage that meets certain standards.

If the cost of a plan from your employer that would cover you (and not any other members of your family) is more than 9.5 percent of your household income for the year, or if the coverage your employer provides does not meet the "minimum value" standard set by the Affordable Care Act, you may be eligible for a tax credit. (An employer-sponsored health plan meets the "minimum value standard" if the plan's share of the total allowed benefit costs covered by the plan is no less than 60 percent of such costs.)

**Note:** If you purchase a health plan through the Marketplace instead of accepting health coverage offered by your employer, then you may lose the employer contribution (if any) to the employer-offered coverage. Also, this employer contribution—as well as your employee contribution to employer-offered coverage—is often excluded from income for federal and state income tax purposes. Your payments for coverage through the Marketplace are made on an after-tax basis.

### How Can I Get More Information?

The Marketplace can help you evaluate your coverage options, including your eligibility for coverage through the Marketplace and its cost. Please visit **HealthCare.gov** for more information, as well as an online application for health insurance coverage and contact information for a Health Insurance Marketplace in your area.
